If a child comes to enroll in a public school kindergarten, the first grade, or the second grade, the age requirements for public school is set in Subsection 6 of the Nevada Revised Statutes (NRS) 392.040. The law states that for kindergarten the child must be 5 by September 30th and for the first grade the child must be 6 by September 30th. For a child to enroll in the second grade within the public schools of Nevada the child must be 7 years old by September 30th of the school year and the child must have completed kindergarten and the first grade. There are no exceptions to the age requirement except for students who became residents of Nevada after they have completed kindergarten or first grade in another state that allows an earlier attendance age than Nevada. It is noted that the NRS only defines minimum age requirements for kindergarten, first grade and second grade. (The entire law is available on the Nevada State Legislature website.)

Status of 2007-2008 Private Schools

During the 2007-2008 school year, the private schools had an enrollment of 21,582. This is an increase of 720 students over the previous school year's private school enrollment. The number of kindergarten students had a 50 student decrease. This 50 student decrease in kindergarten enrollment brought the total enrollment to 3,450 students. The private school enrollment in grade 1 through grade 8 was a 394 student increase. The elementary enrollment increase of 3.1% brings the count to 13,229. The high school enrollment increase was 24.5%. The high school total enrollment was 4,903. The only private school that has an ungraded program is Sierra Nevada High School, a United States Job Corp Center. The reason for the increase in the high school enrollment is the boarding school growth. The boarding schools are located primarily in the rural areas and offer secondary programs.

The directory information is put into several figures and tables.

Figure 1 shows how the total private school enrollment is concentrated into the two large counties of Clark and Washoe. Clark County private schools have a total of 16,155 students. This represents 74.9% of the total state private school enrollment. Washoe's 3,925 students represent 18.2% of the total state private school enrollment. All three sections, Clark County, Washoe County and the rural areas showed an increase this year. The rural areas private school population increased 19.9%. Washoe County increased 1.9% and Clark County increased 2.5%.

Figure 1: Total Private School Enrollment

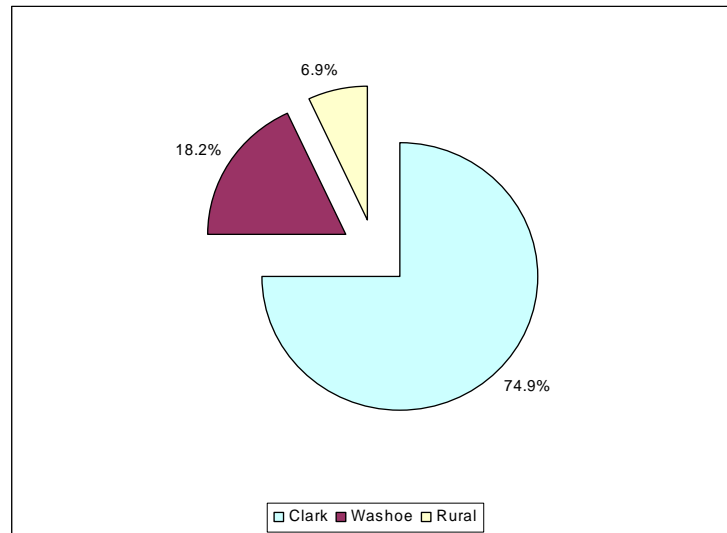

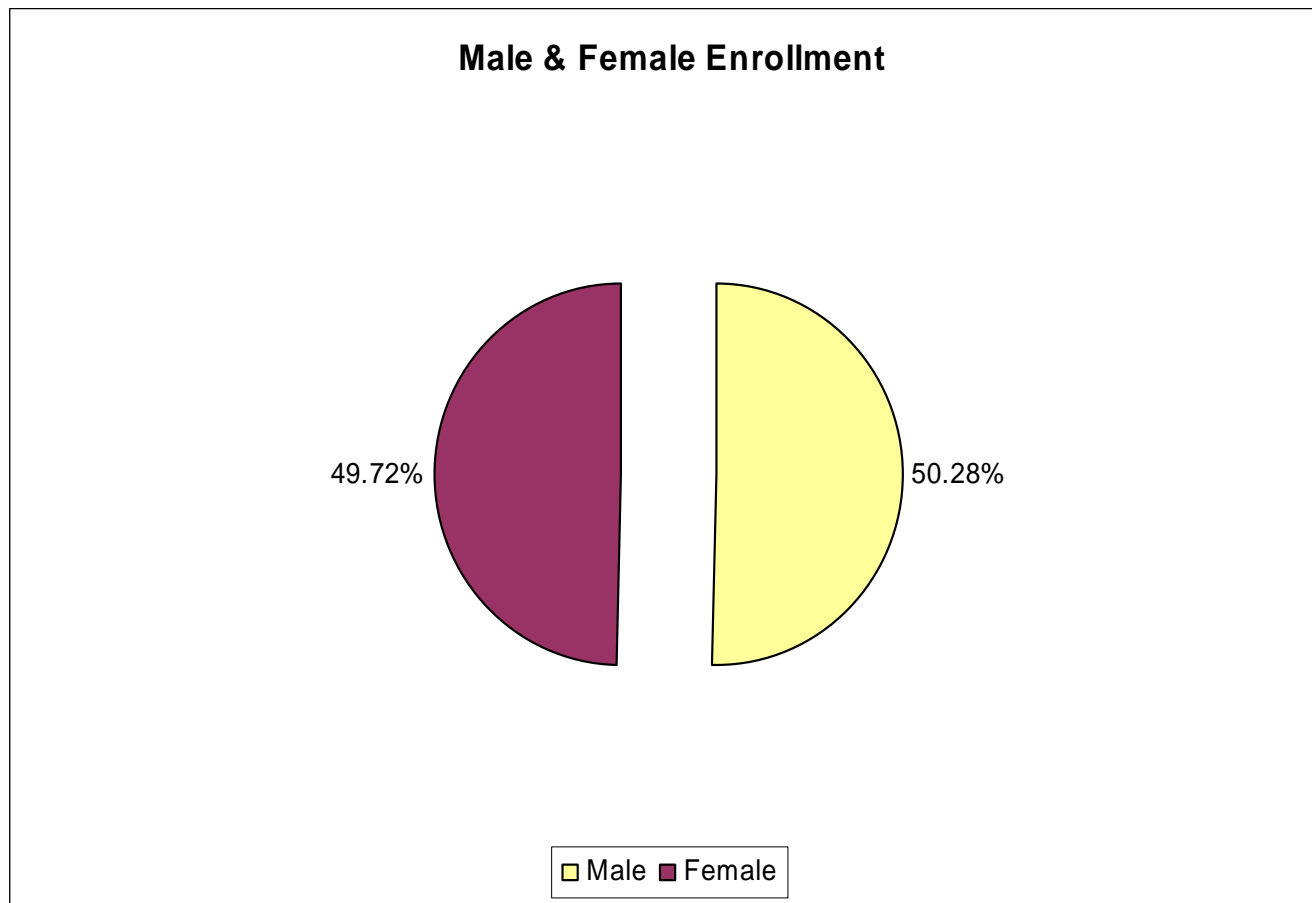

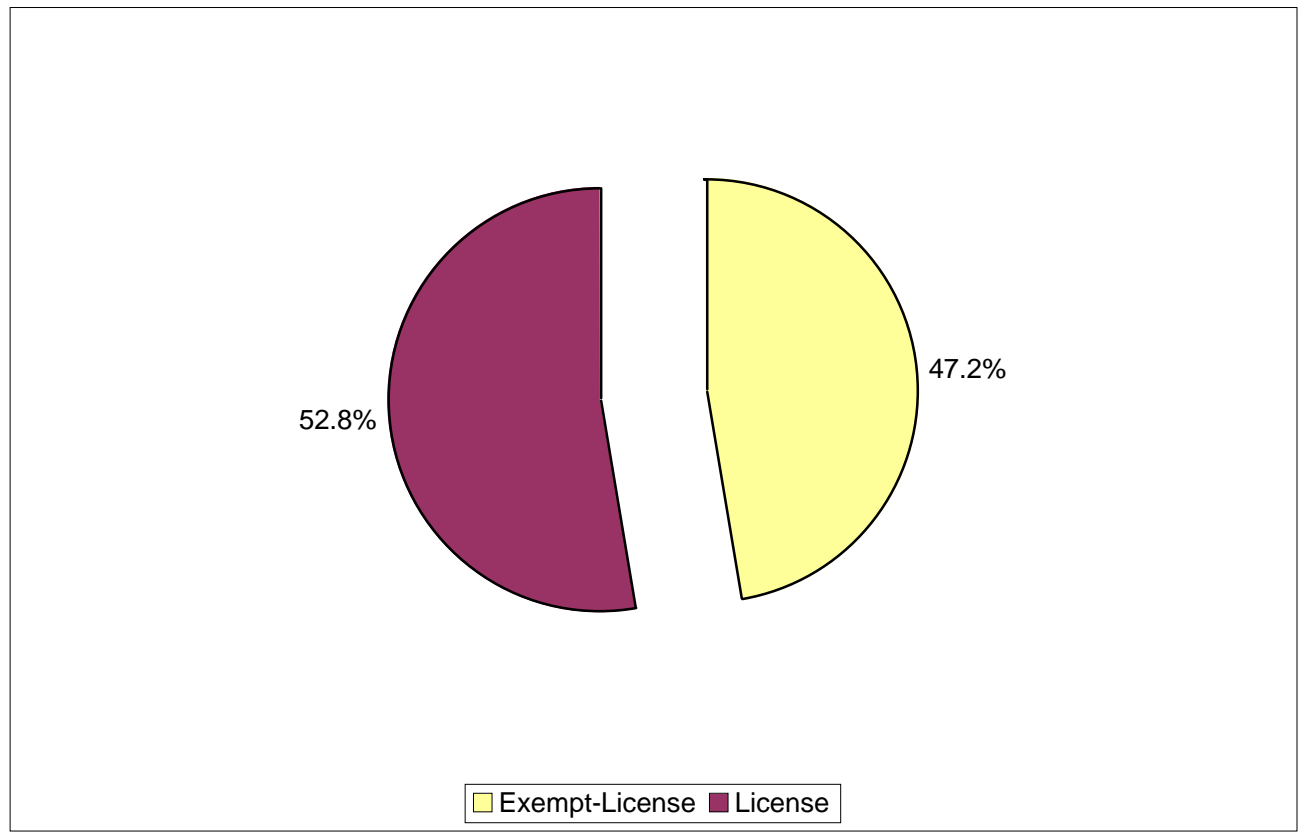

Figure 2 shows the private school enrollment by gender. For the 2007-2008 school year, the female enrollment is 10,731 while the male enrollment stood at 10,851.

Figure 2: Enrollment by Gender Percentage

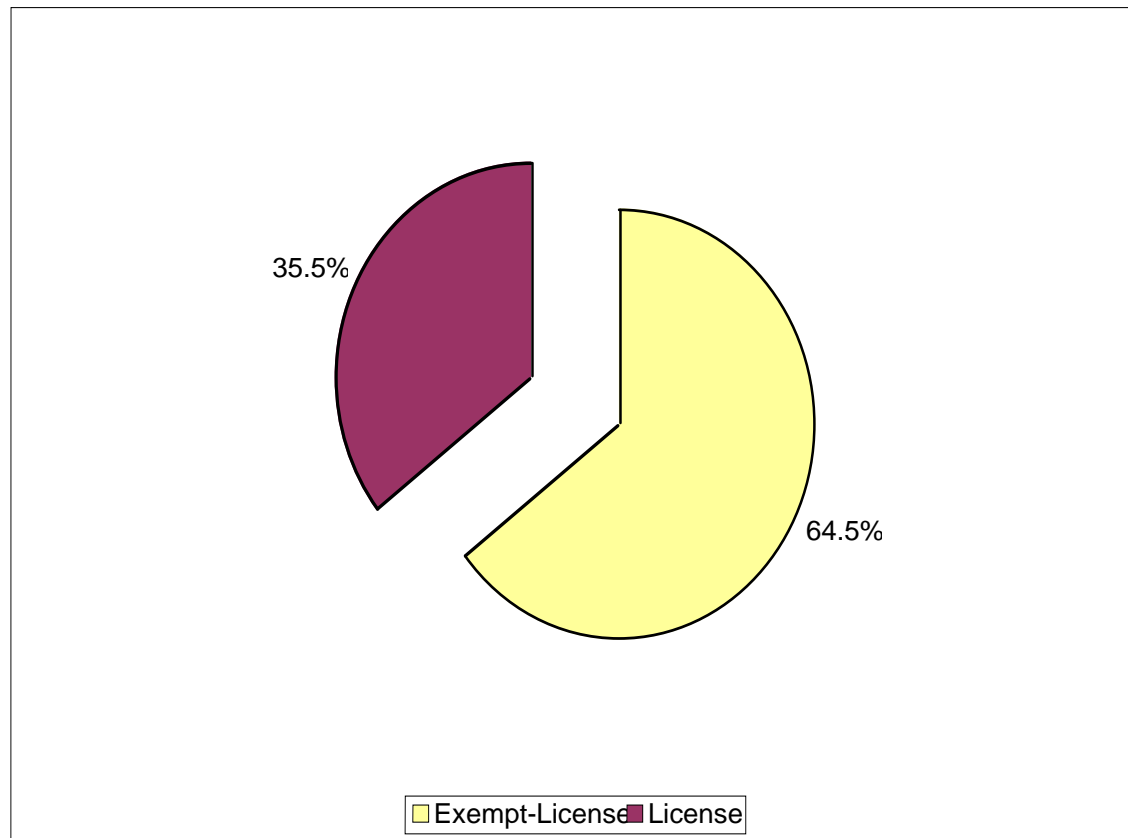

The state of Nevada has two types of private schools which were created in 1975. One type is the private licensed school and the other type is the exempt private school. During the 2007-2008 school year there were 159 private schools, of which 75 were exempt schools and 84 were private licensed schools. This makes one more private school than last year.

Figure 3: Private Schools by Type of License

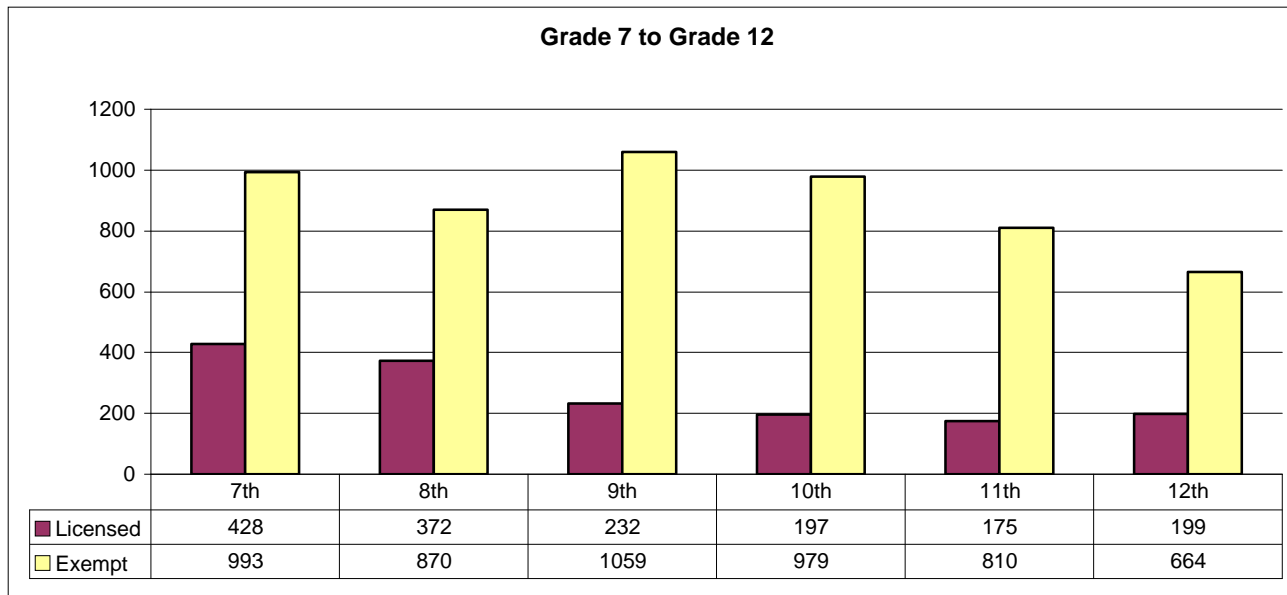

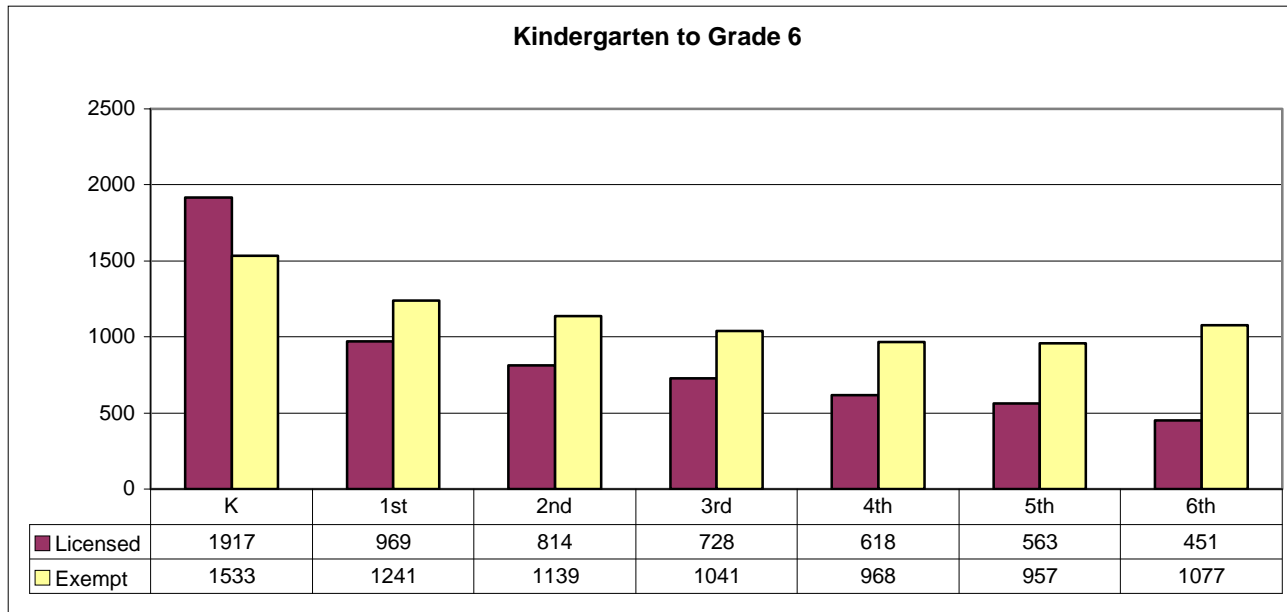

Of the 21,582 private school enrollment, 13,919 students are enrolled in exempt schools and 7,663 are enrolled in private licensed schools. The exempt private school enrollment increased by 728 students. The private licensed school enrollment decreased by 8 students. The private licensed schools represent 35.5% of the enrollment and the exempt school's enrollment equals 64.5%.

Figure 4: Private School Enrollment by Type of License

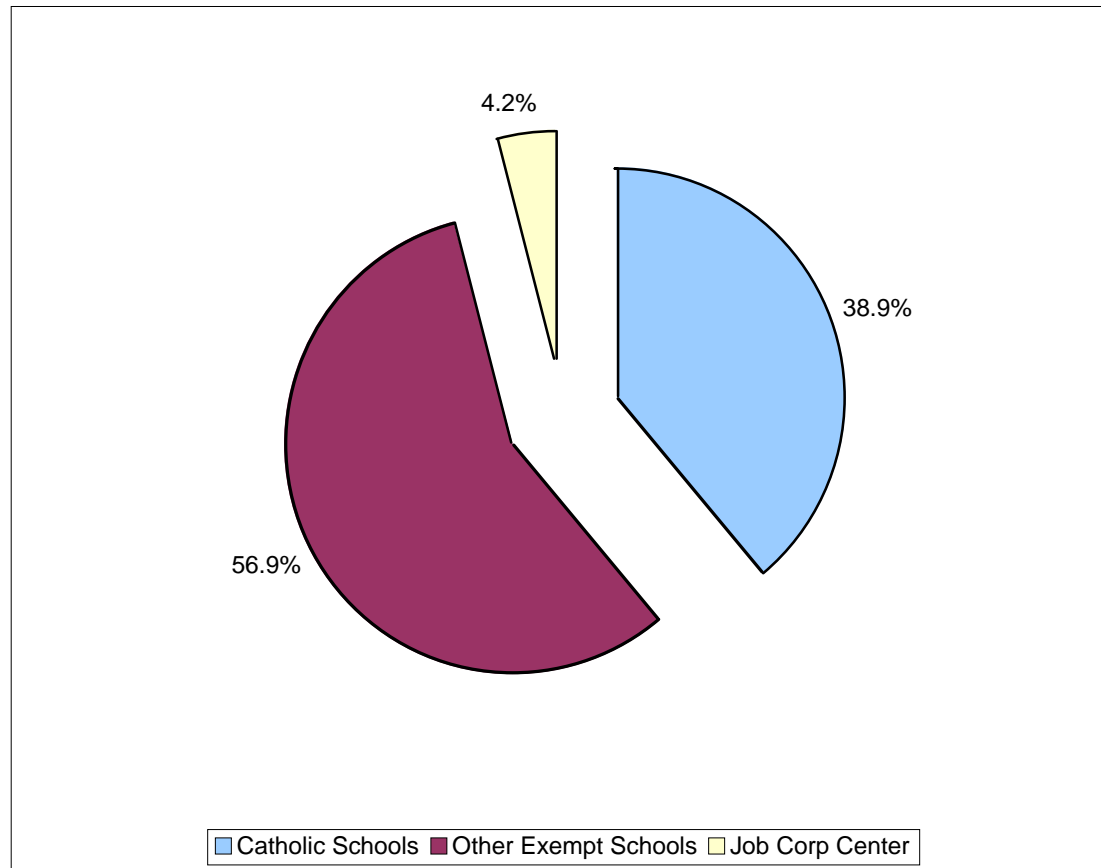

Another way to look at the private school enrollment is to separate the private schools and the exempt private schools by educational level. The two bar graphs below separate the two types of schools by their enrollments.

The Diocese of Las Vegas and the Diocese of Reno schools' enrollment represent 38.9% of the exempt private school enrollment. The two Dioceses private combined school enrollment is 5,411. The Job Corp Center (Sierra Nevada High School) in Reno is an ungraded high school and has an enrollment of 588. The remainder of the exempt private school enrollment is 7,920.

Figure 5: Exempt Private School Enrollment

The following chart illustrates the enrollment of the private school students in the state of Nevada. Since 1990, the percent of private school student enrollment compared to the public school enrollment has ranged from a low of 4.42% in the 1992-1993 and 2006-2007 school years, to a high of 4.97% this school year.
